Dear All,

As you would now be aware, Northern NSW Football is has moved to a new competition management system, not only to display ladders, results and stats but also to make the process for team sheets and match data much more simplistic with significantly better data available quicker than it ever has.

From Saturday 18th February, we will no longer require any paper team sheets for PYL, NPL and Northern League One, as all team sheets will be online through the Squadi app. This app will allow you to very quickly tap and select your players and officials for the game to submit, and then allow the referee to allocate scores, goals and cards to be uploaded immediately after the match. We will make blank paper team sheets available for the initial two weeks of transition in case there are any teething issues.

NNSWF and Squadi will be running a short training session on how to submit your team sheet through Squadi this coming Wednesday 15th February. The session should run for approximately 15-20 mins and we would encourage all team officials who have the responsibility of doing team sheets on match day to log on for the training.

We understand not every can make a single night, and we will look to record the session and make that available the following day.

Please also ensure you have confirmed your users for Squadi as per Memo 9.

The transition to Squadi will reduce make it quicker and easier to enter your players on the team sheet and will make match data, including goal scorers, cards etc available much sooner.

If you have any questions, please don't hesitate to ask.
